PTO-90C (Rev. 07-01)

	Application No.	Applicant(s)	III			
Advisory Action	09/751,577	MILLER, ROSS	•			
A Committee of the comm	Examiner	Art Unit				
	John J. Wilson	3732				
The MAILING DATE of this communication appe	ars on the cover sheet with the c	correspondence add	ress			
THE REPLY FILED 21 January 2003 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE. Therefore, further action by the applicant is required to avoid abandonment of this application. A proper reply to a final rejection under 37 CFR 1.113 may only be either: (1) a timely filed amendment which places the application in condition for allowance; (2) a timely filed Notice of Appeal (with appeal fee); or (3) a timely filed Request for Continued Examination (RCE) in compliance with 37 CFR 1.114.						
PERIOD FOR REPLY [check either a) or b)]						
a) The period for reply expiresmonths from the mailing date of the final rejection. b) The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection. ONLY CHECK THIS BOX WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).  Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
1. A Notice of Appeal was filed on <u>21 January 2003</u> . Appellant's Brief must be filed within the period set forth in 37 CFR 1.192(a), or any extension thereof (37 CFR 1.191(d)), to avoid dismissal of the appeal.						
2. The proposed amendment(s) will not be entered b	ecause:					
(a) They raise new issues that would require further consideration and/or search (see NOTE below);						
(b) they raise the issue of new matter (see Note below);						
(c) they are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or						
(d) they present additional claims without canceling a corresponding number of finally rejected claims.						
NOTE:						
3. Applicant's reply has overcome the following rejection(s):						
4. Newly proposed or amended claim(s) would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).						
5. ☐ The a) ☐ affidavit, b) ☐ exhibit, or c) ☐ request for reconsideration has been considered but does NOT place the application in condition for allowance because: See Continuation Sheet.						
6. The affidavit or exhibit will NOT be considered be raised by the Examiner in the final rejection.	cause it is not directed SOLELY	to issues which we	ere newly			
7. For purposes of Appeal, the proposed amendment explanation of how the new or amended claims w			and an			
The status of the claim(s) is (or will be) as follows:	:					
Claim(s) allowed:						
Claim(s) objected to:						
Claim(s) rejected:						
Claim(s) withdrawn from consideration:						
8. The proposed drawing correction filed on is			niner.

S. Patent and Trademark Office			<del>-</del>			

Continuation of 5. does NOT place the application in condition for allowance because: With respect to claims 1-5, the claims are to a structure, not a method. Structure is properly met if the structure is shown by the prior art, regardless of the process used to make the structure. Therefore, "digitally generated" is properly not given patentable weight. The method steps claiming how and when the articles are intended to be used are matters of intended use of known structures and not given patentable weight. The claims are limited to "polymeric" shells. This material, while well known in the art, is not specifically talked about in Andrews, and that is the purpose for the use of the Bergersen reference. As to all of the claims, Kurz uses conditional language, "can be" or "may" when describing the use of the invention without any other orthodontic appliances. This does not negate the teaching of Kurz that a solution to the problem of moving teeth can be solved with the use of plural shells. Kurz does not teach that the invention cannot be use with other appliances. Further, applicant's invention, may or may not be used with other appliance, and therefore, no criticallity can be attributed to this feature. With respect to Andrews and Chishti et al, Chishti teaches that more than one shell can be used to solve the problem of moving teeth. Ilt would be obvious to one of ordinary skill in the art to replace the one of Andrews with plural devices. That Chishti also teaches that the shells can replace wires and brackets does not obviate this.
